

Water-cooled COD digestions units with external controller and lift functionality

20 sample positions

- Rugged metal enclosure
- Sample rack and cooler cassette made from stainless steel
- Automated and simultaneous digestion of up to 8 or 20 samples
- Programmable
- The sample rack and cooler cassette can be moved up and down independent of each other for particularly simple and safe handling
- Simple and safe sample handling due to separation of sample rack and cooler cassette
- Easily programmable thanks to „behr single-button operation „
- Menu navigation in local language.
- The unique behr COD range ensures standardised sample digestion as required by ISO 6060 etc. ($148 \pm 3^\circ \text{C}$ in sample vessel, temperature of $148 \pm 3^\circ \text{C}$ is achieved within 10 minutes)
- External controller
- When used with behrotest® AS 1 absorption vessels, the unit qualifies for aqua regia digestion of heavy metal samples
